9 April 1965

MEMORANDUM FOR : Mr. Kirkpatrick
SUBJECT : Identities for DCI

1. For your information, a complete and thorough review of the identities on file in the Cable Secretariat for use on DCI cables is now being undertaken by DDP.

2. [] has detailed [] and an assistant to review each identity, with the objective of substituting where appropriate a descriptive identity which will not pin-point an individual, e.g., an identity which might now read "Mr. John R. Doe, confidential secretary to the Premier of XYZ" would be changed perhaps to: "A person with access to high level government documents in XYZ". The idea is that the identity would meet the needs of the DCI equally well as the present system and better protect the identity of the source.

3. As part of the review, our files will be up-dated, obsolete crypts removed, and all in all, we will be in better condition to serve the DCI.
